## Free Meson Seminar

- Speaker* : Karim Trabelsi  
(KEK, Japan)
- Topic* : Hadron Spectroscopy Results
- Day, Date & Time* : Thursday, January 24, 2013  
at 2:30 p.m.
- Place* : AG 69

### *Abstract*

We report on the most recent experimental progress on X,Y,Z charmonium-like meson states and their possible counterparts in the  $b\bar{b}$  system. Results discussed will be not only from the B-factories Belle and BaBar, but also from the Tevatron and LHC experiments.
